**Statement of GSM, W-CDMA, and LTE Functions Disable**

Product: Mobile Phone  
Model No.: FJL21  
FCC ID: YUW-FJL21

GSM900, DCS1800, W-CDMA Band I, LTE Band XI, XVIII.

The above device (mobile phone) has capability of GSM900, DCS1800, W-CDMA Band I, LTE Band XI, XVIII. These functions cannot be activated by the user in case the mobile phone is used or switched on in the United States. These functions can also not be activated by the user in case the mobile phone is outside of the service area of a mobile phone network while switched on. In both cases, these functions are also not activated automatically.

And this device has LTE function on Band XI, XVIII. This function cannot be activated by the user in case the mobile phone is used or switched on in the United States. These functions can also not be activated by the user in case the mobile phone is outside of the service area of a mobile phone network while switched on. In both cases, these functions are also not activated automatically.

When the mobile phone is inside the service area of a mobile phone network, it will search all available cellular networks. These functions will not switch on automatically unless mobile phone detects networks having GSM900, DCS1800, W-CDMA Band I, or if the mobile phone detect network having PCS1900. Therefore these functions are never activated in the United States where there is no commercial network for those services. While searching for the network the mobile phone does not transmit any signal.

Also, the user access to all functions related to GSM900, DCS1800, W-CDMA Band I will be disabled where it cannot detect networks having those services, or where it can detect network having PCS1900 and these prevents the user from manually switching on these functions.
