Statement

We, Fujitsu Toshiba Mobile Communications Ltd., state that our device with the FCC ID: YUW-FJI12, does not support RFiD function when charging battery.

Besides, RFiD function is only for Japanese market. We will use the software to disable these functions when roaming overseas. This software allows the device to recognize where the signal is originated from. When the device detects the signal is not from Japanese base station, the function of RFiD will be disabled automatically.

Sincerely yours,

Takanori Tanaka
